Title: Low-cost neuromodulatory priming techniques for post stroke motor rehabilitation

Presenters

Sangeetha Madhavan PT, PhD
Na Jin Seo PhD
Mary Ellen Stoykov OT, PhD

LEARNING OBJECTIVES

1. Define the concept of neural priming and its relevance to neurorehabilitation
2. Describe three types of low-cost neural priming paradigms and their associated neural mechanisms
3. Compare and contrast the clinical benefits, limitations, and underlying mechanisms of the various types of neural priming presented.
