Title: Episode 9: Understanding the Movement System Diagnosis with Kathy Gill-Body

Description: In this episode, we talk to Kathy Gill-Body about her role on the Movement System Diagnosis task force. Kathy shares her impressions and applications of the movement system, including how she uses it in her clinical practice, and future directions for movement system diagnosis. She also shares her journey as a physical therapist involved in clinical practice, research, and teaching, and how she has been able to make connections and take advantage of a variety of opportunities to develop her interests.
